TRAINING ON THE IMPORTANCE OF ACTIVITY HUMAN (how to facilitate the participation of people with disabilities in community life)

Description

Activity in the broad sense includes everything that a person accomplishes during his day. This therefore includes everyday activities, but also professional, leisure, but also family or societal activities. Anyone who can no longer access their own activities, or in a limited way, is in a situation of disability. This limitation of activity can then lead this person to exclusion within his environment. Our work as a rehabilitator is therefore an accompaniment to a return to a life "as normal as possible" by reducing these situations of disability to allow the person to be able to once again access the lifestyle habits that have meaning for him.

concerned public

Paramedics (Physiotherapists/Orthoprothetists/Nurses/Speech therapists)
Doctors, Psychologists

Objective

Encourage health professionals to personalize patient support according to their life plan, taking into account their personal factors, lifestyle, environment and abilities

Expected results

At the end of the training, the participants:

- ✓ learn to better identify a situation of disability
- ✓ better identify the components of human occupation.
- ✓ will be made aware of the possible means of reducing a situation of disability.
- ✓ can adapt their follow-up to the lifestyle of their patient.
- ✓ can raise awareness about the importance of these issues.

Training content

- ✓ Introduction and current practices in France around the occupation human.
- ✓ Analysis of the professional practices of the various participants
- ✓ Theoretical presentations around the fundamental principles of the activity and disability situations.
- ✓ Case studies: presentation of different situations of disability and example of solutions to reduce them.
- ✓ Practical workshop between the participants
- ✓ Projection on their professional practices and feedback on training expectations

Program of the training

- ✓ Adapted hours
- ✓ Effective and practical manuals: We are committed to providing all our training with specially designed documentation. These are both supports used during training, but also real working tools for after training. We pay great attention to the quality of these documents, which will be regularly updated and enriched.
- ✓ Training methods based on andragogy: We are aware of the adult nature of the participants in our training and we undertake to take this into account, and to offer them training according to this particularity.

Trainers

French occupational therapists from the Ergo Togo association will provide this training in the form of interactive courses combining different media: Gaëlle FERLAY, Pauline SALMON, Clara ONNO

training duration

The training will take place for two (02) days, on December 2 and 3, 2019

Sanction

A training certificate signed by the OADCPH and Ergo TOGO will be issued to each participant at the end.

Registrations

- ✓ Individual entries will not be received. They must be sent by orthopedic centers or workshops.
- ✓ The training costs are CFAF 50,000

Other information

One week before the start of the training, you will receive a complete pack of practical information including:

- ✓ the place where the training takes place
- ✓ schedules
- ✓ the access map
- ✓ methods of transportation
- ✓ the equipment to be provided
